Detrack Account Setup

Distribution · https://mountainstream.co/docs/detrack-account-setup/

To create a Detrack account, visit: https://app.detrack.com/dashboard/#/register

[Screenshot of Detrack's sign-up page featuring the Detrack account setup form on the right and a promotion on the left offering a free first driver for live delivery tracking. A blue Sign in button appears in the upper right corner.]

Connect Streamline to Detrack

1. From the Detrack dashboard, navigate to **Settings › API Key**.
2. Select **Generate a new API key**.
3. Copy the API key to your clipboard (Select, CTRL + C).
4. Paste API key in **Streamline › Distribution › Settings - Detrack API Key**.
5. Select **Save**. Streamline and Detrack are now linked.

[A screenshot of the Detrack dashboard during Detrack account setup shows the Account menu expanded. The API Key option is highlighted with a purple arrow labeled 1, alongside options like Organization, Job, PDF, and Vehicle.]

Assign Streamline Routes to Detrack

1. Navigate to **Distribution › Settings › Route Manager › Format 2**.
2. Select the **Edit** pencil next to the route name.
3. Assign vehicle to route.
4. Select **Save**.

Install the Detrack POD App and Add Your First Vehicle

To complete the setup, install the Detrack Proof of Delivery (POD) app on your phone and add your first vehicle.
