The Driver Report

Distribution · https://mountainstream.co/docs/driver-report-guide/

The Driver Report lists the addresses that we are visiting on the given date, organised according to the Route Manager. There are two options: PDF ready and The Manifest.

PDF may be generated in **Distribution › Dispatch › Dashboard.** It is not customisable.

[A software dashboard, such as The Driver report, displays a table with packaging details. Overlays highlight steps to show/hide fields, expand menus, and adjust column widths. Purple arrows and numbers guide users to customize the table’s display and settings.]

Customise The Manifest: Show/hide columns (blue eye icon) and adjust column widths.
