Items

Production · https://mountainstream.co/docs/items-streamline/

Settings

Items › Items Settings

[A web page titled Items Settings displays options for managing Items attributes and food declarations, with checkboxes for settings like price, tags, category, and various nutritional information.]

Batch Edit

Items › Master Catalogue › Batch Edit

[A production management dashboard displays a report with columns for item names, categories, prices, inventory status, planners, and items, along with checkboxes and filters. A right sidebar shows filter options and a print/notice menu.]

Master Catalogue

Items › Master Catalogue

[A bakery inventory software screen displays categories like Bread, Brezel, Burger Buns, Croissant, Rolls, Artisan, and Bagels, each with expandable lists showing available items and product availability bars next to listed products.]
