Shopping List

Inventory · https://mountainstream.co/docs/shopping-lists/

Stock › Suppliers › Shopping List

- When marking a recipe Done, the ingredients used are automatically depleted from inventory and added to the Shopping List.
- The Shopping List becomes a Purchase Order when it is sent to the Vendor (Supplier).

[A shopping list screen displays supplier names, delivery dates, and totals. The highlighted green New Purchase Order button stands out, while a text bubble notes that manual purchase orders can also be created from the shopping list.]

- Select a Supplier Name to view, amend and place the order. If the email address of the supplier is loaded to their file, they will receive an email notification of the purchase order.

[A purchase order form on a software screen with purple callouts highlighting features like automated/own input, shopping list integration, back-dated dates, product addition, price update, and quantity amendment options.]
