Tracing and Recalling

Inventory · https://mountainstream.co/docs/stock-traceability/

Three categories of Lots

- **Raw Materials Purchased.**
- **Master Catalogue Items.**
- **Recipes Made.**

To Trace a Lot

Navigate to **Stock › Ingredients › Trace**.

Search results will return every Packing Slip and include every item, enabling quick and easy recall of the goods.

[Screenshot of a supply chain traceability interface highlighting stock traceability, featuring a search bar labeled Type to search... with a purple callout pointing to it, saying Enter Lot# here.]

Recall a Lot

Navigate to the applicable **Items Sold Lot**

- Recall the entire lot or individual delivery notes.
- An automated recall email is sent to the applicable customer/s.

[A software screen displays stock traceability details for Pain Rustique. Buttons allow recalling all, collapsing sections, or recalling by lot or delivery note. A large arrow highlights the recall options for specific items.]
