OptimoRoute – Streamline

Distribution · https://mountainstream.co/docs/streamline-for-optimoroute-usage/

OptimoRoute field settings for streamline and their function.

- Hover over **Distribution › Settings › OptimoRoute**

[Screenshot of OptimoRoute Settings showing fields for API key, two driver export options, and four dropdown menus labeled Capacity label 1 to 4 under Load Settings. The DISTRIBUTION tab is highlighted to help streamline OptimoRoute usage.]

1. OptimoRoute Api Key – Unique access used to export order data to your OptimoRoute account.

Go to OptimoRoute API Key instructions.

2. Only export routes with Driver external identifier – Only export orders data for Routes with Driver External Identifier set.

Go to Set Driver external identifier to Route for instructions.

3. Automatically assign Driver to order by External Identifier – Will automatically assign an OptimoRoute Driver to the exported order matched by Driver External Identifier if set.

Go to Setup Driver External Identifier for instructions.

4. Load Settings – Use to pair and match Streamline's Packaging type and OptimoRoute's vehicle capacity settings.

Go to Load Settings for instructions.
