User Permissions FTP

Unlimited Users · https://mountainstream.co/docs/user-permissions-ftp/

User accounts that have the right to Edit FTP import orders will see the orange icon “*i*” in the top menu which indicates there are orders to import from the FTP location.

To set permissions, go to **Company › Users**.

[A permission settings table for Admin displays User Permissions FTP Import Orders with Edit selected, alongside options like Shortcuts, Customer Attributes, Customers, Production, and Routes with various selections.]
